

yor than half a century has gone to up the records of the past since Clatsh valley first came into promi-An official order was insued July 181, by Brigham Young, Governor tha Territory and ex-officio superinest of Indian affairs, establishing indian reservations for the Ter-They were the Uintah valley, Pasvan and the Parowan. Stephen Ross, a sub-agent, was assigned to intah, and several Ute tribes were red to move thereto and make it or home. The boundaries of the reson were not then definitely deand there was little need of reon for the white man was not e disputing the right of possession at remote region.

Best in Utah Given Up.

the lands of the beautiful Sait Lake and of the fertile valleys south Itah lake were being appropriated Mormons, and the Indiana were reant to obey this order to move and grender their homes and lands to

usurpers. the rich, unlimited range must be no up, the cultivated patches, the pres of their dead, the camping places familiar hunting grounds, the very the Utes had been able to find in all must be relinquished to satisfy gred of the white man. Some of Cintah Utes and a few of other assigned to the Uintah valley edled with the order, but other conof the field with the Mormons and sted an Indian farm to be worth non cow, and the Indian got the or a township of land to be worth mall herd, and the Indians tried to the herd.

the files of the Valley Tan and the at News of those early times all show how the kindness of the ies falled to palliate the grief of the at the slaughter of game creexpressly for the Indian, as he utt, and at banishment from the alors to live in the snows of the sins and subsist on buds and beg nuts.

Napoleon of the Desert.

he "Napoleon of the desert" in those rs was Walker, chief of the Utes, i he contested for supremacy until stope died in his breast. He was not as a terror to white people, but to the er tribes of his own race, whose Miren he is said to have captured and add to Mexicans for horses. These were carried to Mexico and Mismis and sold to become home per-mis in the homes of the people. How hard was the task of the chiefs dmen to hold the Utes at Uintah be imagined from a message sent Chief Tabby: "Tabby sends word to bishops that he can control his

no longer. Vintah Agency Permanent.

he first official act of the Governrelating to the Uintah reservation so date October 2, 1861, when it was suffer by Executive order, which orto 1, 1861. There was, however, no to the reservation until after a made at Spanish Fork reserva-farm in 1855. It was the intention this time to place all the Utah Inwere but 1500 of them there, out

the terms of the treaty they were quish title to lands previously move to and settle permaon the new reservation within a cultivate crops and send their made to pay the chiefs annuities, the tribes \$25,000 annually for the M Years; \$20,000 annually for the wenty years, and \$15,000 annually

ality years thereafter. Tabby Takes Homestead.

Untake were more given to agriby and better disposed, and would most Pkely have kept the pledge if the money had come as expected. But there was a lack of compliance on the part of the Government and of the other Indians, and the Uintahs got hungry and discouraged, and Chief Tabby himself later became totally disheartened and skipped back to Skull valley and filed on a homestead of 160 acres, had it fenced and farmed, proved it up and got his patent.

But since then Tabby and the Uintah

But since then Tabby and the Uintah reservation have been inseparable. He was a man of peace; a chief beloved, who bequeathed an inheritance of good conduct, and whose memory is cherished by all his people. If Tabby's tomahawk was ever raised against his fellow-man it must have been under greatest provocation or in obedience to a superior chief.

He is no less a hero who stands like a Gibraltar among his people, unmoved by threat or entreaty, and stays the hand from blood and saves the home

from sorrow and desolation.

Peace has her stalwarts who hold in steady poine the fiery rage of offended dignity till cooled by softened counsel. Such a hero and such a stalwart was Tabby.

Tably.

The Indians on the reservation had evidently received very little encouragement, the agent preferring to live at a safe distance from the Utes, hence there was little show of improvement about the agency, which was first located on the Duchesne at an altitude too high for the growth of crops. In 1868 a new assency was selected seventy 1868 a new agency was selected seventy miles east and on the Uintah river at White Rocks, and here the Utes took a new start and raised 1000 bushels of wheat in 1869; 1500 bushels of potatoes; 900 of corn; 400 of oats, besides a good supply of garden vegetables.

Critchlow Agent 13 Years.

J. J. Critchlow was appointed agent in 1879, and took up his residence on the reservation in 1871, and began systematic dealings with the 860 Indians who then belonged there. During his long term of thirteen years he is profuse in his praise of the Utes, and commends them for loyalty to him and the Government, and for patience and composure under the most trying circumposure under the most trying circum-stances. At this time the base of sup-plies was Sait Lake City, 200 miles distant, and the road intolerably bad, and open but four months in the year. Living was precarlous, but when supplies ran short the Indians hunted more buckskin, appealed to Brigham for more blankets, and pleced out a mere existence, continually hoping that Washington would not always be so

Indians Good Mormons.

In the early days the Mormons tried o placate the Indians and keep down trouble, and at one time more than half the Utes at White Rocks agency were members of their church. This church believed it had a special mission to the Indians, whom it calls Lamanites and claims are descended from the ancient Lews. The Utes did not dispute the lews. The Utes did not dispute the nission at first, for they discovered the nore baptisms among them, the more blankets; besides, they did not object to plural wives up to about three, and ould indorse any tenet of their faith that did not trench on their own super-stitions. They attended church at the agency, observed "Shinnob Day," were industrious in fencing and farming, and gave promise of constant advancement.

A \$70,000 Massacre.

But a disturbing element came among them after the Meeker massa-cre of 1879, when 400 White Rivers were among the street and the peaceable Ulntahs. The White Rivers had been found guilty of the brutal murder of Agent Meeker and others, and the penalty inflicted was removal from Colorado and the payment of \$70,000 out of their funds to the families bereft by the massacre. These families bereft by the massacre. These ability and the payment of \$70,000 out of their funds to the families bereft by the massacre. These families bereft by the massacre. These families bereft by the massacre and a bill approved signed to the light of the light of them is not so neither the Unitah reservation, families bereft by the massacre. These Indians came over in 1882 and drew the for they were opposed to agriculture and echools and all civilized agencies, and for several years resisted the per-emptory demands of the agents to work and send their children to school.

Schools and Witchcraft.

Compulsory education is the most unpopular innovation at the agency, worse even than "hair cutting," and if children take sick at school and die there is trouble. An epidemic of mea-sles broke out at the White Rocks school a few years since, and Indian parents were intent on taking their

children home, but were forbidden. Finally, Black Hawk broke through the guards and got to his children, threw the agency physician over the bed, the Industrial teacher down stairs and carried his children out In savage life no punishment is too severe for witchcraft, and the Ute word for schoolhouse means a house

where witchcraft is learned. Indians Wronged in a Trade.

The other Indians removed to Utah from the Colorado reservation were the Uncompanares, and they were assigned to a reservation lying between the Colorado line and Green river. This

on the Uintah reservation for the re-linquishment of all lands not needed for allotment to their own recopic.

for allotment to their own people. This allotting commission was appointed November 28, 1894, under the incumbency of Hon. Hoke Smith, Secretary of the Interior, and consisted of S. S. Stott, Uchee, Ala., Timothy A. Byrnes, Atlantic City, N. J., and William S. Davis, Little Rock, Ark. They arrived at the agency December 21, 1894, and began work, reciving a per diem of 36 each, together with actual and necessary traveling and incidental expenses while on duty, and were allowed a cierk. lowed a clerk

from first to last they were accomplishing nothing.

A Commission That Did Allot. A year and a half elapsed and an A year and a hair elapsed and another commission was appointed, and proceeded to Utah under instructions dated August 25, 1897. It was composed of James Jeffreys, Ross Guffin and Howell P. Myton. They held councils with the Indians, took them into their confidence, and entered unen their their confidence, and entered upon their duties without opposition, and made eighty-three allotments on the Uncomexpenses while on duty, and were allowed a clerk.

On August 19, 1895, William S. Davis pahgres paid the Uintahs and White

pensation of not to exceed 15 per cent of the sum to be allowed the Indians. A fee of possibly \$825,000 to be paid by poor, deserving claimants for the collection of a debt from a guardian. The amount due them should, in reason and justice, be arrived at by the Government through its paid officials, and promptly placed to their credit and disbursed as needed.

Is it not a reflection that our Govern-

Is it not a reflection that our Government is so inefficient in its control and management of Indian affairs, that the very wards of the Nation are obliged employ counsel to test their rights the courts and thus recover money due them by absolute agreement, and about which there should be no contro

The Uintah a Big Reservation.

Previous to the recent surveys the Uintah reservation contained 2,033,040 acres, but the true southern boundary is found to be several miles farther south, and this addition with others on the east and west will materially add to the original area. Deducting 250,000 acres south of the Strandard and the servers and the servers are to the servers and the servers are th to the Original area. Deducting 200,000 acres south of the Strawberry, assigned to the Indians for range, then the 48,000 formerly allotted to the Uncompaghre and a possible 100,000 acres by the recent allotments, there would yet remain about 1,650,000 acres, estimating the additions by the late surveys.

the additions by the late surveys.

More than 1,090,000 acres may be counted on as mountain, mineral and grazing lands, then a township of tim-ber should be set aside for the Indians, and a few sections embracing the coal mine. The steam sawmill might be thrown in by way of encouraging the Utes to discard the old tepees and build

frame houses with Queen Anne fronts and modern Mary Ann backs. In all this intermountain region the water supply must be reckoned with, and it is no exaggeration to state that the Uintah reservation is the best watered district in all Utah. The streams are fed by perpetual snows away up on dizzy summits and in deep ravines, and flow to the plains with a fall of 100 feet to the mile, and at the foothills can be readily diverted to the higher levels.

Rivers, Lakes and Trout.

The Duchesne is the principal river and receives the waters of all the other streams in its course to Green river. The Uintah, Lake Fork, Rocky creek, White Rocks creek and also fine streams of clear water, all coming out of the mountain canyons of the Uintah and Wasatch.

Away up at surprising altitudes are beautiful lakes as exceptional and enchanting as any on the continent, and in the quiet waters of these lakes and the tumbling, dashing flow of the creeks are sporty trout waiting for a frolic with the white man's bait and hook. Alfalfa, Grain and Fruit.

The Uintah basin has an elevation of 4500 to 6000 feet, and has somewhat shorter seasons than valleys farther south, yet all cereals and most vegetables are successfully grown, and the Ashley valley, twenty-five miles east, grows as fine apples and other fruits as

are produced in the State.

It is presumed that where Indians grow crops with satisfactory results white men can, and the Utes have been raising wheat and oats and alfalfa hay for years on both the river bottoms and the uplands; the most extensive farming being done on the "bench" away above the river valley. These red men of the mountains are not thrifty farmers, but they sell thousands of dollars worth annually of their varieties outs beyond struck the mile. surplus oats, hay and straw to the mil-itary post near by-Fort Duchesne.

Asphaltum and Minerals

The extent and variety of the mineral deposits are undetermined, for the pub-lic is debarred from prospecting on an Indian reservation, but the greatest as-phaltum beds in the world are in this extensive basin. The various hydrocarbons are known to be there on a cosured, and when the prospector gets the privilege of delving here for the pre-cious metals we may expect to see the short stretch of mountain between the reservation and the rich mines at Park honey-combed through and through.

Railroads.

The survey of the Denver, Northwest-ern & Pacific, known as the Moffat road, is through the best part of the reservation, and the road is already completed from Denver into the mountains of Col-orado. When this line is finished finished

Lake City. A spur from Mack on the Rio Grande Western is now operated to Dragon, a point within forty-five miles of Ouray on Green river.

Hitherto the only accessible railroad point was at Price, Utah, 110 miles from the agency, and to and from that sta-tion all products and goods had to be

transported by teams. Reservation Opening.

It would be presumption to offer instruction to prospective settlers about the method and requirements in taking land at the opening, in advance of the President's proclamation. It is, how-ever, Indian land and must be paid for at the rate of \$1.25 per acre. Each home-steader will be entitled to 160 acres, and under existing law must prove continu-ous residence on the land selected four-teen months prior to making final proof. The race and rush for a dandy claim, and then contention and litigation have given way to the drawing method. Sevand then contention and litigation have given way to the drawing method. Sev-eral places for registering are published, after the registration numbers are de-posited in and drawn from a box, and then a week or ten days allowed for examination of the land. If you select no land you lose no rights, and can wait for life with Indians somewhere else, say in Alaska, but you will not find better Indian friends than the Utes of Itah.

The opening of this vast tract is of especial interest to the people of Utah, who know it best, and appeals to homescekers elsewhere. The farmer and the stockman will seek it, the miner and lumberman; the trader and townbuilder. The prospector and speculator will be in the procession, and the conservative In-dian will be so overcome by the transformation that he will repose in his wick-i-up and kindly let out his allot-ment to white men on the shares.

The Ute Salutation "Mike."

There is a population of 1100 Ute In-dians on the reservation, composed of the three tribes, the Uintahs outnum-bering the others, and they quite gener-ally speak some English and wear citiclothes. It cannot be expected that they carry on a conversation in English without occasionally introducing a word of their own language, and ing a word of their own language, and settlers should meet them half way and acquire some Ute. It will be easy to understand that "mike" means "how do you do?" "mike wash," "how do you do, my friend?" "oah" is "yes"; "kutch" "no"; "kutch-" "no good"; "monch" means "father" and "pee-ats" "mother"; "inepegunt" "you are crazy"; "te cuva sah-reets" "do you eat dog?"

The Indian is just coming out of his

The Indian is just coming out of his shell; don't expect too much of him. The world is much larger than he expected, and the white man more cunning than he ever imagined. He has seen the worst of our civilization and but little of the best, and has no desire to go to the white man's heaven. He cannot throw away his superstitions, legends, traditions and myths until he has found something really better. Be gentle with

A Land of Honey.

The Scriptures advise us of "A good land and large, a land flowing with milk and honey." Is Utah not referred to? Thirty-six Delawares could nestle with-in her boundaries, and there would be room left for a sun dance, a camp-meeting and an intermountain exposi-tion all going at once.

Uintah county is the banner bee county in the State and its honey pro-nounced by Chicago dealers the best in the world. The leading bee firm in the county produced in one season from 160 colonies 53,000 pounds of extracted honey, an average of 331 pounds for each

The bees are as industrious as the Mormons and the Mormons as the bees

and the significant emblem of the Lat-ter-day Saints is the bee-hive.

State Absorbs "Old Uintah." The diversified industries of the State appeal to all seeking active industrial life in the West, and the great reclama-tion enterprise of the Government will encourage the investment of capital in Utah and in all the intermountain country. The addition of 2,000,000 acres to the productive capacity of Utah, paying their tribute in agriculture and stock, in gilsonite, elaterite and other hydrocarbons, and in rare and precious met-als, will show very favorably in the statistical reports, and soon the old Uintah reservation with its undeveloped, multi-plied resources captured by a new and aggressive people, will be lost forever in the industrial, political, social, throlbing life of the great sovereign State.

STATE OF WYOMING INDIAN INDIAN MOUNDS

The Uintah Indian Reservation-Best Reached From Price, Utah.

body of land of nearly 2,000,000 acres is compangre or the Uintah reservation, or elsewhere in Utah. Each head of a family was to receive one quarter see each of agricultural land; each single person and child one-eighth sec-tion each; the Indians to pay \$1.25 per acre out of funds in the U. S. treasury arising from the sale of the Colorado

An appropriation was made for the purpose, and a commission appointed and instructed to report, also what ortion of the reservation was unsuitable or not required for allotment, and to negotiate with the Indians residing died. Up to September 14, 1895, the commission had spent \$12,190 of the appropriation, and it was evident more them at the same time \$10,000 for a must be appropriated if the

The Secretary relieved them February 4. 1896, and on the 13th they retired from the field, having spent one year, one isfaction of seeing the complete fulmonth and twenty-four days in Utah. and, presumably, spent all of the \$16,000 appropriated.

They accomplished what? Echo an swers, what? The Utes reply, kutchi. The people of Utah know, and the afore said Secretary knows there was noth ing done. The commission had reported that it was impossible to induce the Un-compangres to take allotments and pay \$1.25 an acre for them, because lintahs had not been required to pay for their lands. The commission proved to be an ex-

ceptionally extravagant failure, but the Secretary of the Interior continued them in the field till the money was them in the field till the money was rights. Half a dozen attorneys have through it will afford the public the exhausted, and should have known taken the case for the Indians at a com-

or \$60,000, and the Government paid them at the same time \$10,000 for a strip cut from the east side of their reservation designated as mineral land Howell P. Myton was appointed In-dian agent at White Rocks while serv-

Utes After Uncle Sam.

In passing, it would show lack of courage not to revert to an obligation of the Government to the confederated band of Utes. These Indians surrendered their reservation in Colorado which embraced almost one-fifth of the entire area of the State, on condition that they should be paid for the land as sold; and it is claimed there is now due them over \$5,500,000 for lands disposed of.

Senator Teller offered a bill a year ago for their relief and to bring the matter to a final determination of their

BEST WAY TO NDIAN REACH THE

According to act of Congress, the Uintah reservation should be open to settlement on March 10, 1905. The reservation comprises approximately 120 town ships, or 2,600,000 acres of land-the best agricultural and fruit lands in Utah. All of this will be open to the homesteader with the exception of 250,-000, lying just south of the Strawberry creek, in the southern half of the reservation, which will be held for the Indians, who now occupy the entire tract.

As will be seen from the accompaning map, the reservation lies in the northeasterly portion of the State, about one hundred miles north of the Rio Grande Western railway and a hundred and twenty miles south of the Union Pacific railroad, and may be best reached from Price, Utah, 121 miles east of Salt Lake City and about a like distance from Grand Junction, Colo.

From Price, Utah, there is a daily Concord stage line, modern in equipment and with as good service as may be found anywhere. The wagon road is open and is traveled the year round. In addition the Board of County Commissioners, at Price have agreed with the Price Bureau of Information to spend a considerable sum of money to keep this road in good repair.

On this road, which runs through the reservation to Vernal and the Ashley Valley, are hundreds of teamsters with headquarters at Price to handle the freight of intending settlers. Their rates are reasonable and bay and grain and water are plentiful

along the route. There are also postoffices and telegraphic and telephone communication as far as Fort Duchesne and Vernal, including the agencies and

towns on the Uintah and Uncompangre reservations. The vast area in question, once the bed of a great inland sea, is fertile beyond question. The soil generally consists of a rich alluvial deposit of sedimentary mould of so great a depth that no artificial fertilizer will ever be required. The topography is rolling, consisting of valleys and mesa lands rising in plateaus toward the mountain ranges which form the north and westerly boundaries of the reservation. Natural watersheds are on both south and north, and the whole country can be systematically irrigated from the numerous rivers and streams within its boundaries.

Along the mountain ranges on the north and

west, within the boundaries of the reservation, there is much mineral wealth, though as yet, on account of the absence of railroads, developmentment work has been very slight. The snowfall is light except on the mountain ranges. The fact of the heavy snowfall on the mountains makes Price, Utah, the best route for entering the reservation country.

Every qualified resident of the United States, male or female, who is over 21 years of age, and persons under 21 years of age who are the heads of families, are qualified to make a homestead entry on this land. Full particulars as to methods and places of registration will be issued in a few weeks by the Department of the Interior and will later be issued in pamphlet form by the Bureau of Information of Price, Utah. All questions cheerfully answered.

THE BUREAU OF INFORMATION, PRICE, UTAH.
